Wilson, D. B., 220
Winch, J. E., 44
Wolton, K. M., 7, 113, 295

SUBJECT INDEX, VOLUME 25, 1970

Altitude, grasslands, effect on, 312
Apparatus, yield measurement, rape, 119

Barley
  meal, silage additive, 136
  preceding crop effects, 30
  silage, whole crop *v.* artificially dried, 37
Beef production
  calf rearing, 92
  grazing management, 85
  in U.K., 78
  silage, 96
    supplementation, dried fodder, 180
  weight at turn-out, relation, 214
Book reviews
  Brady, N. C. [Ed.] Advances in agronomy. Vol. 21, 247
  Campbell, J. B. Experimental methods for evaluating herbage, 246
  Chase, A.; Niles, C. D. Index to grass species maintained in the Division of Grasses, Museum of Natural History, Smithsonian Institution, 104
  Cragg, J. B. [Ed.] Advances in ecological research. Vol. 5, 104
  Fried, M.; Broeshart, H. The soil-plant system in relation to inorganic nutrition, 314
Book reviews (*continued*)
  Gould, F. W. Grass systematics, 191
  Hogan, R. M.; Haise, H. R.; Edminster, T. W. [Eds] Irrigation of agricultural lands, 192
  Hubbard, C. E. Grasses. A guide to their structure, identification, uses, and distribution in the British Isles, 104
  Lowe, J. [Ed.] White clover research. Occasional Symposium No. 6, British Grassland Society, 246
  McVean, D. N.; Lockie, J. D. Ecology and land use in upland Scotland, 247
  Martin, H. (Ed.) Insecticide and fungicide handbook, 314
  Richardson, M. Translocation in plants, 192
  Rorison, I. H. [Ed.] Ecological aspects of the mineral nutrition of plants. A symposium of the British Ecological Society, 191
  Semple, A. T. Grassland improvement.
  Skoropanov, S. G. Reclamation and cultivation of peat-bog soils, 104
  Steward, F. C. Growth and organisation in plants, 314
  Whittington, W. J. [Ed.] Root growth. Proceedings of the fifteenth Easter School in Agricultural Science, University of Nottingham, 105
Botanical composition, grazing effects, 295
British Grassland Society
  history and development, 195
  Winter meeting
    Presidential address, 1
    papers read at 78, 85, 92, 96, 180
Brome grass (*Bromus inermis*)
  cutting date, 44
  grazing, mixtures, 144

Calves, grazing behaviour on turn-out, 214
Carbon content, roots, 236
Clover
  red (*Trifolium pratense*), roots, chemical composition, 236
  white (*T. repens*)
    cutting date, mixtures, 113
    grazing effects, mixtures, 113, 144
    N content, measurement, 329
    roots, chemical composition 236
    v. N application, 7
Cocksfoot (*Dactylis glomerata*)
  growth analysis, N application, 20
  roots, chemical composition, 236
Competition, 309
  cutting, 172, 207
  sowing rate, 172

Cultivation methods, hill grazing improvement, 210
Cutting
  competition effects, 172, 207
  date, 44, 113
  grazing simulation, 198
  height, regrowth relation, 220

DM content, measurement errors, 329
Death and decay, plant material in sward, 198
Digestibility, maturity stage effects, 154
Dried fodders
  field beans, whole crop, 228
  intake, 180
  v. silage, 125

Excreta, return to sward, simulation, 295

Fescue
  meadow (*Festuca pratensis*)
    grazing, liveweight gains, 53
    hay, liveweight gains, 162
    tillers, 107
  tall (*F. arundinacea*), subsequent crop, effect on, 30
Field beans (*Vicia faba*), drying and pelleting, 228
Flowering date, tillers, 107
Formic acid, silage additive, 65, 318

Grasses—see also individual species
  N application *v.* clover, 7
Grassland
  evaluation, in tropics, 73
  hill, improvement methods, 210
  soil and site conditions, 312
Grazing
  behaviour, calves, on turn-out, 214
  cattle *v.* sheep, 144
  excreta return simulation, 295
  management, beef production, 85
  rest periods, 53
  simulation, by cutting, 198
  systems, rotational *v.* continuous, 144, 198
  winter, spring growth effects, 167
  yield measurement method, 220
Growth, spring, winter grazing effects, 167

Irrigation, fertilizer N interaction, 301

Kale (*Brassica oleracea* var. *acephala*)
  preceding crop effects, 30

Leaf rigidity, anatomy relation, 233
Light utilization, grass mixtures, 325
Liveweight gains
  calves, on turn-out, 214
  grasses, trials, 53
  grassland evaluation, 73
  silage supplementation, 37
Lucerne (*Medicago sativa*)
  cutting date, 44
  mixtures, grazing effects, 144
  pellets, silage supplementation, 37
  roots, chemical composition, 236

Milk production, silage, 65, 318

Nitrogen
  application
    date, 301, 306
    grasses, 7, 20, 154, 242
    grass/clover, 7, 312
    residual effects, 343
    split *v.* single, 301
    winter grazing compensation, 167
  content
    measurement errors, 329
    roots, 236
  interaction, irrigation, 301
  mineralization, 335
Nutrient cycling, grazing, 335

Peatland, grass production, 131
Phosphorus
  content, roots, 236
  mineralization, 335

Rape (*Brassica napus*), yield measurement, 119
Ribgrass (*Plantago lanceolata*), competition, 172, 207
Roots, chemical composition, 236
Ryegrass
  Italian (*Lolium multiflorum*)
    digestibility, 154
    growth rate, 242
    N application, 154, 242 301
    N, residual effects, 343
    subsequent crop, effect on, 30
  perennial (*L. perenne*)
    competition, 172, 309
    drying and pelleting, 125
    grazing, liveweight gains, 53
    hay, liveweight gains, 162
    leaf rigidity, anatomy relation, 233
    mixtures of genotypes, 325
    N application, 301
    N content measurement, 329
    regrowth, 220
    roots, chemical composition, 236
    silage, 125
    varieties, mixtures, 309

Silage
  additive
    barley meal, 136
    formic acid, 65, 318
  bacterial flora, 70
  beef production, 96
  making
    losses, sealing effects, 136
    wilting, 37, 318
  milk production, 65, 318
  nutritive value, 37
  supplementation, dried fodders, 37, 180, 228
  v. dried fodders, 125
Slurry distribution, experimental plots, 72
Soils
  nutrient cycling, 335
  site conditions, grassland, effect on, 312
Sowing
  methods, hill grazing improvement, 210
  rate, competition effects, 172
Stocking rate, liveweight gain trials, 73
Sulphur content, roots, 236

Temperature, accumulated, spring growth commencement, 306
Tillers, age, and flowering, 107
Timothy (*Phleum pratense*)
  cutting date, 44
  grazing, 144
    liveweight gains, 53
  hay, liveweight gains, 162
  mixtures, clover, 144
  roots, chemical composition, 236
Tropics, grassland evaluation, 73

Water use efficiency, irrigation, 301
